

Form for determining the correct ring size Smart RING NO.1

1. Fold the paper along the dotted line in the center of the circle, then cut out the semicircle. You will be able to determine the correct size by inserting your finger into the hole (if your ideal size is between two different sizes, we recommend choosing the larger size).
2. Cut out the ruler. Wrap the ruler around your finger. The point where the end of the ruler intersects with the arrow and the line with a specific number is the correct size. (If the ideal size is between two different sizes, we recommend choosing the larger size.)

Print this page in landscape orientation on standard A4 paper at the original document size (actual size - 100%).

After printing, the line must be 10 cm long
